ADVANCE

Next Generation of Advanced Therapies' Specialists

Career coaching Webinar

April 22nd, 1pm - 2.30pm

HOW DOES THE HIRING WORK FROM THE EMPLOYERS SIDE?

REGISTER NOW

The ADVANCE Programme is an Innovative and Focused Learning Programme for Future Advanced Therapies' Developers

The event is for early career scientist in the biomedical field interested in making a transition from academia to industry. How does the hiring process work on the employer's side? What happens to your resumé and cover letter, once you have send it in? This webinar will give you a view into the hiring manager's mind in the form of a panel discussion.

LinkedIn

Moderator: Nicole Wedell von Leupoldt - KU Leuven Career Center

Nicole's first CV was good enough to become a founding member of a university in Hamburg, Germany. Once the university was set up, she and her colleague established the Career Development Office, where they put together a series of training sessions for the international students to pursue their career in Germany, needless to say that CV and motivation letter writing was one of the pillars.
As a Career Advisor at a Belgian Business School for MBA students and later as a freelance Career Development Coach and trainer for international talent coming to Belgium, CV and motivation letter advise have always been a bigger part of her working.
Now, at the Career Center for PhDs and postdocs at the University of Leuven, she is the liaison between the academic and the non-academic labour market.
