eatris

European infrastructure
for translational medicine

WHAT IS EATRIS?
We're the European infrastructure for translational medicine. We bring together resources and services for research communities to translate scientific discoveries into benefits for patients.

WHAT DOES EATRIS DO?
We provide access to pre-clinical and clinical expertise and facilities that are available from over 175 top academic centres across Europe. We focus on improving and optimising the development of drugs, vaccines and diagnostics in the fields of advanced therapy medicinal products, biomarkers, imaging and tracing, small molecules and vaccines.

HOW CAN EATRIS HELP ME?
We offer services for both academia and industry across various research fields. In addition, we work with public funding agencies, charities and policy makers with tailored actions to help improve the translational research and innovation ecosystem. We also provide regulatory services, training and mentoring.
