

USING THE LOGO

The preferable format is EPS. There are two versions of the logo: with and without a tagline.

WHITESPACE

The logo needs to have enough whitespace around and needs to be placed on a white background. In case the background can't be white, make sure to use the transparent version of the logo (from EPS).

TAGLINE

The logo with tagline can only be used when the font of the tagline is big enough to be easily read. If not, or when in doubt, please use the logo without a tagline.

Especially online the logo can be employed without tagline as there will be a hyperlink behind the logo linking to the EATRIS website (www.eatris.eu).
