

### Are you planning to submit a grant proposal? EATRIS can help strengthen your application

Horizon Europe is the EU's key funding programme for research and innovation. As part of Horizon Europe, the Marie Skłodowska-Curie Actions Work Programme (MSCA) provides funding for training and equipping researchers with new knowledge and skills. In order to successfully secure MSCA funding, proposals need to demonstrate the ability to effectively train creative, entrepreneurial and innovative doctoral candidates, and be able to convert knowledge and ideas into products and services for economic and social benefit. Proposals also need to be cutting-edge, and include a plan for exploiting and disseminating results.

#### EATRIS CAN HELP STRENGTHEN YOUR PROPOSAL BY:

- Showcasing how to identify steps for successful translation of your research into societal benefits.
  - *Performing an innovation check*: EATRIS can help identify and exploit the innovation potential of your project, and assist in developing exploitation strategies.
- Contributing the following services and training activities:
  - *5-day 'Translational Medicine Explained' course*: This course provides an overview of the medicine discovery and development process. EATRIS can deliver the course for a fee, either online or face-to-face, for up to 15 PhD students and/or early-stage Post-Docs.
  - *5-day Personalised Medicine course*: This course provides a comprehensive overview of current developments and challenges in personalised medicine. EATRIS can deliver the course for a fee, either online or face-to-face, for up to 15 PhD students and/or early-stage Post-Docs.
  - *2-day workshop on 'Theory and practice of industry and academia collaboration'*: This workshop gives Principle Investigators the opportunity to learn about how to address the challenges and benefits of public-private collaborations.
  - *Webinar series*: EATRIS can co-develop a webinar series on relevant topics such as reproducibility, innovation and drug repurposing.
  - *E-learning 'TransMed Academy' platform*: EATRIS hosts online self-paced courses around key aspects of translational medicine, such as "*The landscape of translational medicine*".

#### EATRIS AS A PROJECT PARTNER

For targeted support, EATRIS can complement the beneficiaries' experience and join your project as a partner. We only join a limited number of proposals each year, so you need to get in touch with us as early as possible; a minimum of two months before submission is advisable and ideally during the concept phase. After identifying your training needs, we can provide you with a cost estimate.
